Education

Master of Science: Computer Science	Utah State University	(Apr 2023)
AWS Certified Developer: Associate	AWS	(Feb 2024 - Feb 2027)
Bachelor of Arts: Art History and Business	Brigham Young University Idaho	(Apr 2013)

Competencies

Go	Java	Spring	Javascript	PHP	Python
HTML	CSS	Vue	Angular	AWS	Kafka
Cassandra	Docker	Jenkins	Cypress	MySQL	DynamoDB

Languages

English - Native

Spanish - Fluent in Writing, Reading, Speaking, Listening

French - Intermediate in Writing, Reading, Conversational in Speaking and Listening

Employment

Software Engineering Manager

Kunai (PWC) - *(Apr 2025 - Present)*

- Oversaw Client integration of Capital One's acquisition of Discover Card Network
- Managed Division of eight engineering teams with 30+ engineers
- Architected solutions in AWS and GoLang to handle client implementation needs
- Implemented solutions to connect Discover Card Network into Capital One using GoLang
- Established performance review program for engineers within division, and enacted continual performance reviews
- Participant in the AI Pilot Program within the PWC/Kunai integration

Tech Lead

Kunai - *(May 2024 - Apr 2025)*

- On AirKey project, managed three to five senior backend engineers as Technical Lead
- On Discover project, operated as manager for three engineering teams with a total of twelve engineers
- Implemented interview process for Kunai, and operated as manager to support ongoing technical interviews
- Provided delivery reports of engineering progress for leadership visibility
- Coordinated workflows for multiple engineers to help meet OKR's

Senior Software Engineer

Kunai - *(Feb 2024 - May 2024)*

- Built RESTful Go backend lambdas and ECS (Fargate) containers
- Managed IaC for AWS services, including: SQS, IAM, Lambda, S3, DynamoDB, RDS, SNS and ECS
- Managed IaC for ancillary services: Jenkins, GitHub and SonarQube

- Built RESTful Java backend Docker containers for ECS deployments
- Designed and managed DynamoDB and PostgreSQL data and queries
- Constructed unit, component and integration tests utilizing Go, Cucumber and GoDogs
- Built Open Telemetry integrations within Go to support telemetry data
- Managed Splunk and New Relic dashboards for product visibility
- Created written, recorded and video documentation

Senior Software Engineer

Freemodell Inc - *(Jan 2023 – Feb 2024)*

- Engineering lead for multiple cross-engineering releases
- Developed serverless web applications in Go, Lambda, and GraphQL
- Developed web clients using ReactJS
- Designed, managed and integrated with Non-relational database DynamoDB
- Leveraged DynamoDB event streams and Kinesis streams for event based processing
- Managed collaborations with frontend and IOS teams for rapid development
- Created Cloudformation templates and AWS resources for serverless environment
- Constructed roadmap of upcoming features with Product Manager and CEO
- Established integration and unit tests framework for web application

Senior Software Engineer

Moov Financial Inc - *(Mar 2021 – Sep 2022)*

- Developed RESTful web applications in Go and Mux
- Designed Micro-service architecture for user information and PII
- Collaborated with Product and Management team to plan product features and roadmap
- Mentored team of middle level engineers
- Database Architect and designer (MySQL)
- Created automated deployment infrastructure using Github Actions, Docker and Docker Compose

Software Engineer

Space Dynamics Laboratory - *(Sep 2020 – Mar 2021)*

- Principal developer building RESTful web applications in Go and Vue
- Principal Database Architect and designer (Postgres)
- Created automated deployment infrastructure from scratch using Jenkins, Docker and Docker Compose
- Built automated acceptance testing suite and gatekeeper rules using Jenkins, Cypress and GoTest
- Write physical device drivers in Go to connect web applications to physical devices
- DevOps Consultant for internal software engineering teams

Software Engineering Instructor

MTECH - *(Oct 2017 – Sep 2020)*

- Prepared Curriculum for coding bootcamp cohort program
- Provided instruction to coding bootcamp cohorts of 15-20 students
- Graded and reviewed submitted assignments from coding bootcamp students

Software Engineer

DigiCert - *(Aug 2019 – Sep 2020)*

- Build RESTful endpoints using Java, Spring, and Jersey
- Debugged, refactored, and enhanced Java endpoint to reduce bugs for storefront migration
- Develop address validation service in Go utilizing Google Geocoding API
- Optimize Endpoint queries leveraging Cassandra and Java
- Extracted, Transformed and Loaded data related to certificate migration in MySQL and Cassandra
- Develop domain management endpoints using vanilla Javascript and HTML

DevOps Engineer

Verisk Analytics - *(Jan 2017 – Aug 2019)*

- Architect and manage CI/CD process for 200+ repos
- Manage and architect CI switchover from Jenkins to Concourse using Groovy and Python
- Build custom Concourse resources using Bash, Go and Docker
- Contribute to Concourse core platform in Go
- Construct new cloud resources in Cloudformation, Lambda, EC2, ECR, Codepipeline, Codebuild, and S3
- Conversion of multiple libraries/tools to Docker
- Manage Quality Assurance end-to-end testing suites using Protactor, Cucumber, Behave and Selenium

Software Development Lead

ACH Fulfillment - *(Jul 2016 – Feb 2017)*

- Supervised Internal Applications Team of 2 Junior Software Engineers
- Built Event pages using LAMP stack (PHP, MySQL, Apache2 and Ubuntu 16.04)
- Managed App Servers/Database for 3 Internal Applications
- Developed Internal Applications using AngularJS, Angular2, Yii2 and PostGres

Student Teacher

Seminaries & Institutions of The Church of Jesus Christ of Latter Day Saints - *(May 2015 - Jan 2016)*

- Received training on religious education pedagogy
- Prepared lesson plans
- Instructed students in religious studies using established canon of scripture
- Managed classroom organization and administration

Project and Gallery Manager

Holdman Studios - *(Apr 2013 – May 2015)*

- Lead three teams in art glass production
- Displayed, proposed and sold private and public glass art fixtures
- Managed list of clients comprised of: architecture firms, public institutions, private corporations and private citizens
- Instituted new education pedagogy and increased class sizes for art classes
- Managed supply chain of materials for production teams
- Managed marketing efforts for hot glass production and education teams
- Project manager for large scale hot glass production contracts
